Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Response to Arguments***

Applicant's arguments filed 9/1/05 have been fully considered but they are not persuasive. The applicants argue that there is an explicit difference between the particles of Goffin et al. and those of the instantly claimed invention because Goffin et al. does not teach an aggregate size of less than four microns. Rather, the argument states, Goffin et al. teaches that the particles do not aggregate. However, it is noted that when particles are not aggregated, the aggregate size is identical to the particle size. Therefore, no difference is seen between the particles of Goffin et al. and those of the instantly claimed invention.

Moreover, it is noted that the feature upon which applicant relies, specifically that the particles of the instantly claimed invention are formed into aggregates, is not recited in the rejected claim(s). Only an aggregate particle size is claimed, which as stated above may be identical to the particle size. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Regarding the rejections over 102/103, because the particles of Goffin et al. have the same particle sizes as those claimed, the properties of the particles of Goffin et al. are expected to meet the limitations of claims 4-5. No showing that the particles of Goffin et al. would not meet the claimed limitations has been provided, nor have any reasons for such a difference been given.

Claim Rejections - 35 USC § 102/103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Goffin et al. (US 5,290,353).

The rejection of the previous office action is maintained in its entirety and incorporated herein by reference.

Claims 4-5 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Goffin et al.

The rejection of the previous office action is maintained in its entirety and incorporated herein by reference.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1754

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
